## Aqara A100

SMART DOOR LOCK ZIGBEE

Door Lock Evolution: The updated version of our first global smart door lock.

### 98.6% RECOGNITION RATE

Equipped with a fast and high-precision fingerprint reader in the hand, the A100 is able to respond naturally and effectively eliminate false fingerprint.

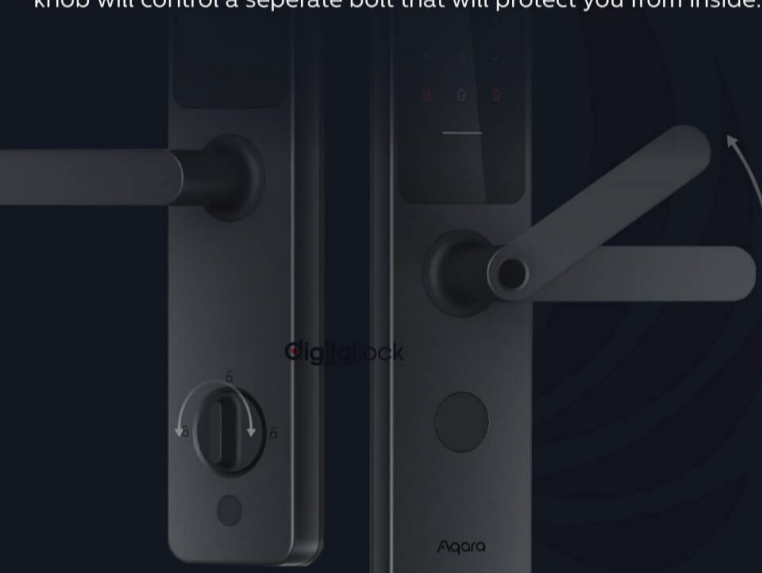

### CONNECTION AS ALWAYS

By connecting a Zigbee 3.0 Aqara hub, you can easily control your door lock remotely, with your voice as well as use it in automations. Remotely configurable passwords and status monitoring also create more convenience in property rental.

### FULLY LOCK FUNCTION

Lifting the handle will provide you with an additional level of security by locking all the multi-point bolts, while the night latch knob will control a separate bolt that will protect you from inside.

### KEEP TRACKING THE STATUS

For an added Peace of Mind: Thanks to the built-in multiple sensors, it can detect the opening and closing state of the door and remind you immediately if you leave it open. It is also available to remotely view the unlocking log for easily tracking the exact time and records.

### EXTRA-LONG BATTERY LIFE

~1.5 YEARS

The Energy Saving technologies make it possible to last for more than 1.5 years\*, which makes A100 one of the most long-lasting door locks on the market.

The A100's battery pack made of 8 AA batteries is split into two groups, that can work independently and notify the user in case one of the groups is out of power.

\*The actual battery life may vary depending on device settings, network environment and usage frequency.

### TYPE C PORT

You don't need to be worried even if there's no battery, you can easily charge it by using a power bank via type-C port. A mechanical key is supported as well.

### SEPERATE AWAY MODE

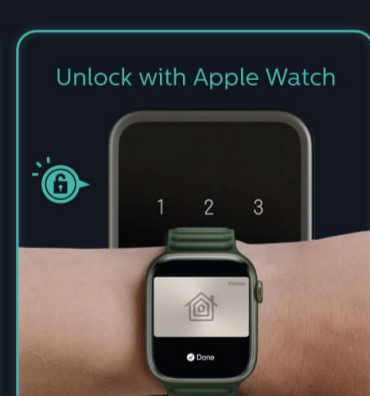

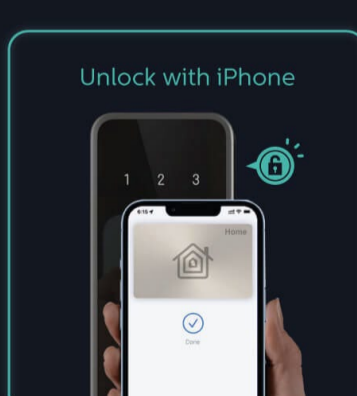

Apart from a keypad that is invisible until you touch it, the A100 has a separate Away Mode button that can be used in automations for Arming Mode security system and turn thing off when you leave.

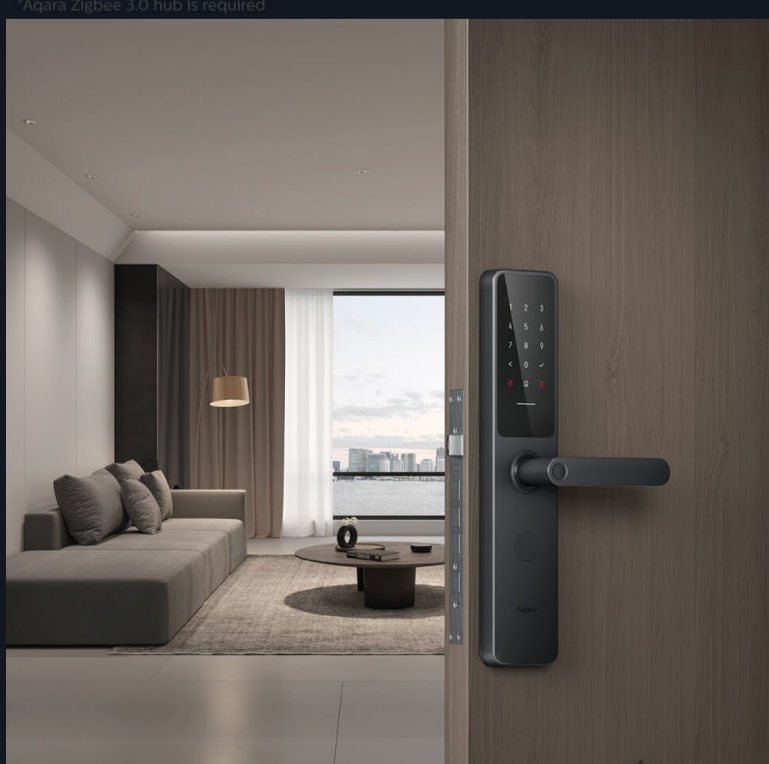

### WORK WITH APPLE KEY

By supporting the Apple Key, it allows you to open the door with your iPhones and Apple Watches. Just hold the device close to the door lock to open the door.

You can add family keys or share the access with others to Apple Wallet using the Home app on your iPhone.

\*Aqara Zigbee 3.0 hub is required
